Indian River County is excited to announce another improvement to our public procurement process - implementing **electronic surety bonds (eBonds)** through Surety2000, a nationally recognized leader in secure, paperless bond execution.

The new process requires contractors bidding on County projects to submit their entire bid, including bid bonds, completely online — eliminating the need for paper forms, notarizations, shipping, or in-person delivery. In addition to saving time for contractors and County staff, the process improves accuracy, reduces administrative costs, and enhances security.

Key benefits of the eBond process include:

Faster bid awards — Bonds are verified instantly through Surety2000's secure platform.

Increased security — Built-in fraud prevention measures, including digital audit trails, QR code validation, and a unique bond number for every document.

Simplified process — Contractors can submit bonds anytime, from anywhere, without the risk of lost or delayed paperwork.

To learn more about Surety2000, please review the educational video provided. [Surety2000 - Learn More](#)

Bidders should complete the below steps:

1. Confirm Bonding Agent Registration

Verify that your bonding agent is registered with the Surety2000 e-Bond platform. If they are not yet registered, direct them to register at this site - [Register Here](#)

2. Bidder Registration

If your bonding agent has an active account with Surety2000 and you (the Bidder) have not already registered, you must also register. The annual fee to utilize the Surety2000 platform is currently \$480.

[CLICK HERE to register with Surety2000.](#)

3. Submit Your e-Bond

Once both the bonding agent and Bidder have active Surety2000 accounts, the Bidder may use the platform to establish and submit the electronic bid bond with their bid.

4. Use Bond Code in Bid Submission

Your bonding agent will provide an 11-digit, unique Surety2000 bond verification code. Enter this code in the "Surety2000 eBond Number" area in Euna Bonfire when preparing your bid. This code allows the County, your bonding agent, and Surety2000 to confirm a valid bid bond has been issued for your project.

Questions and Answers

1. There are 3 buildings with metal roofs; which ones are being replaced...thanks.
There are two cart barns, these roofs are the subject matter. The little 6' x 6' roof will be removed by staff prior to this contract.
2. Specs call for 24 ga metal roof panels, aluminum ridge cap and drip edge...combining dissimilar metals not good practice.
Roof panels are to be PAC-CLAD Tite-Loc Plus panels, 0.040 aluminum, 2" standing seam, 16" wide with striations. Color to be "Cityscape". This matches the new clubhouse roof.
3. ..."industry standard metal roof system warranty..." Will a manufacturer's 30-year material warranty cover this along with our 5-year workmanship warranty?
Yes, this is acceptable.
4. On the north roof, the upper roof area ties into existing siding. Will this existing siding be required to be replaced with new? If so, what type of siding is required?
The scope of this project is not to replace the siding. If it becomes unavoidable, a determination would be made with the Contractor at that time.
5. The spec calls for 24 gauge material with stainless steel fasteners. Are stainless steel fasteners required?
**Please refer to question 2 response for roof panels to be used.
Fasteners must meet the applicable Florida Building Code for the given type of roof and wind zone.**

Addendum Form

6. The spec calls for aluminum drip edge and ridge caps. This is a dissimilar metal to the 24 gauge panel that is specified.

Please refer to question 2 response for roof panels to be used.

7. In order for all bids to be fair; will the soffit, and plywood sheathing replacement be submitted in unit price format?

Yes, an alternate bid item will be provided in the Bid Schedule for per linear foot prices for soffit.

8. The spec calls for the metal to be finished in the color "Cityscape". What year finish warranty is required?

A 30-year finish warranty is expected on the roof panel specified.

9. What standing seam system is specified for this project? There is a nailstrip 1" ht rib x 16" wide panel, where the fastener goes through the nailing flange. OR would you like a panel that is 1.75" ht rib x 18" wide that is attached utilizing clips with fasteners?

Roof panels are to be PAC-CLAD Tite-Loc Plus panels, 0.040 aluminum, 2" standing seam, 16" wide with striations. Color to be "Cityscape". This matches the new clubhouse roof.
